How to Get Real Buyer Inquiries From Your Group Posts

Welcome to the official posting guide for **Florida Real Estate and Open Houses**. As the founder of this community, I see hundreds of agents posting listings and open houses each week. The agents who generate consistent buyer calls follow three foundational rules that work with Facebook's algorithm rather than against it.

The 3 Algorithm Rules for Real Estate Posts:

- 1. Never Put External Links in the Main Caption:** Facebook's algorithm heavily suppresses posts containing off-platform links. Upload 3 to 5 high-res photos directly and put your virtual tour or MLS link in the first comment.
- 2. Be 100% Transparent on Price and City:** Buyers scroll past "DM for price" posts. Clearly listing the price and neighborhood establishes immediate credibility.
- 3. Use a Low-Friction DM Trigger Word:** End your post with a specific trigger word (e.g. "Comment DETAILS for floorplans"). When users comment a single word, Facebook boosts the post and you can message them directly.

Post Framework 1: The "Candid Neighborhood Walkthrough" Hook

Use this framework on Thursdays and Fridays to build weekend foot traffic without sounding like a corporate ad:

If you have been looking for a single-story pool home in [City / Neighborhood] that doesn't have an HOA breathing down your neck, you already know how rare they are right now.

We are holding an open house this Saturday from [11:00 AM to 2:00 PM] at [Address].

A couple honest takeaways from walking this property:

- The backyard is completely private. You sit on the screened lanai looking at mature palms and green space, not straight into your neighbor's living room.
- The kitchen was redone properly: real soft-close wood cabinets, quartz counters, and a layout where you can cook while friends hang out around the island.
- The oversized garage has room for a boat, golf cart, or workshop with no HOA telling you no.

Offered at \$[Price].

If you live in the neighborhood, stop by to say hello (cold drinks and snacks on the counter). If you want the survey, room dimensions, or seller disclosures before the weekend, drop a comment with "INFO" and I'll message it right to you.

Listed by: [Your Name] | [Your Brokerage] | [License #]

Post Framework 2: The "Market Reality Check" Price Drop Hook

Price adjustments get massive engagement when framed around monthly budget savings and zero deferred maintenance:

The sellers listened to the market. We just adjusted the price by \$[Amount Dropped] on this [Bed/Bath count] home in [Neighborhood, City], bringing it to \$[New Price].

At this new number, this is officially one of the lowest price-per-square-foot homes in [Area] that has a private pool and brand-new roof.

Why this matters for your monthly budget:

- At the old price, buyers were hesitating on the rate math. At \$[New Price], the monthly payment drops by roughly \$[Estimated Savings] / month.
- It is genuinely move-in ready: new 2026 roof, updated HVAC, and zero deferred maintenance for you to worry about.
- Located just [Number] minutes from [Beach / Downtown / A-rated schools].

We are scheduling private walkthroughs all week before the weekend open house.

If you want the seller disclosures, average monthly utility costs, or survey sent over, leave a comment with "WALKTHROUGH" or message me directly.

Copy-and-Paste AI Prompts (For ChatGPT, Claude & Gemini)

Paste these tested prompts into your AI tool alongside your MLS property specs to generate high-converting social posts in seconds:

PROMPT 1: HIGH-CTR FACEBOOK MARKETPLACE LISTING GENERATOR

You are an elite real estate copywriter. Take the following property specs and write a high-converting Facebook Marketplace listing description:

[PASTE PROPERTY ADDRESS, BEDS/BATHS, SQFT, PRICE, AND TOP 3 FEATURES]

Requirements:

1. Start with an attention-grabbing first line (under 12 words) highlighting the strongest emotional feature.
2. Format the key specs with clean emoji bullet points.
3. Explicitly state the price and neighborhood.
4. End with a low-pressure Call-to-Action: "Send a direct message with the word TOUR or INFO for private showing availability and full floorplan."
5. Include compliance note: Listed by [Your Name], [Your Brokerage].

PROMPT 2: COMMUNITY GROUP "NEIGHBOR SPOTLIGHT" HOOK

Write a friendly, non-salesy Facebook Group post for a local community group announcing an upcoming open house or new listing at:

[PASTE PROPERTY ADDRESS & KEY FEATURES]

Tone: Helpful, local neighbor, community-focused.

Structure:

- Friendly hook addressing neighbors in [Neighborhood Name].
- 2 sentences highlighting the best feature of the home.
- Exact open house date, time, and parking details.
- Friendly offer to answer questions about neighborhood comps.

PROMPT 3: INVESTOR & SHORT-TERM RENTAL NUMBERS BREAKDOWN

Write a data-focused Facebook post aimed at cash flow real estate investors for this coastal property:

[PASTE PRICE, ESTIMATED GROSS ANNUAL REVENUE, HOA FEES, AND RENTAL RULES]

Highlight: Turnkey condition, short-term rental allowances, historical occupancy, and proximity to ocean/attractions.

Call to Action: "Comment PROFORMA for the complete 12-month revenue statement and expense sheet."

How to Build Flyers in Canva Enterprise with Live MLS Sync

As an active agent at eXp Realty, you receive full **Canva Enterprise** included at \$0 added software fee. Inside Canva, you have access to the exclusive **eXp Listings app**:

The 3-Minute Flyer Workflow:

- 1. Open Canva Enterprise:** Log in with 1 click through Okta / eXp Passport.
- 2. Open the eXp Listings App:** Search your active MLS listing number. It pulls live high-res property photos, pricing, and specs directly onto your canvas.
- 3. Brand Kit Compliance:** Pre-loaded eXp logos and fonts ensure 100% advertising compliance with zero manual resizing.
- 4. Export:** Download 1080x1080 for Facebook feeds and 8.5x11 for print sign-in tables.
