The Golden Rules for 100% Human AI Real Estate Copy

Most agents hate AI copy because it sounds cheesy, robotic, and fake. Every prompt in this vault has been engineered with our **Human Voice Protocol** so outputs sound like a real, experienced local agent talking to a client over coffee.

BANNED ROBOT CLICHES (Never Allowed in Our Outputs):

"Nestled", "boasts", "oasis", "breathtaking", "rare gem", "tapestry", "sanctuary", "delve", "furthermore", "meticulously maintained", "step inside and be amazed".

WHAT WE USE INSTEAD:

Concrete sensory details (morning light, parking a boat, walking 3 blocks to dinner), real numbers, conversational pacing, and genuine plain English.
